

BE Carlos Rodriguez Doñate

Carlos Rodriguez Doñate. He obtained the degree of Electronic Engineer specializing in digital systems in 2008 from Technological Institute of Celaya - Mexico. He is currently studying the Master of Electrical Engineering at the option Instrumentation Systems and Digital in FIMEE - University of Guanajuato, where is working with the analysis of transient vibration of electric machines using techniques digital signal processing hardware. His areas of interest include signal processing hardware, vibration analysis in electrical machines and digital systems, based on FPGA technology
